Hiring Manager
Tech Innovators Inc.
4567 Market Avenue
San Francisco, CA 94110

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer position at Tech Innovators Inc., as advertised on your careers page. With a Bachelor of Science in Computer Science from Stanford University (2018) and over 5 years of professional experience in full-stack development, I am confident in my ability to contribute effectively to your engineering team.

At my current role with BrightCode Solutions, I have led the development of scalable web applications using PHP, Laravel, React, and MySQL, serving over 100,000 monthly users. I collaborated with cross-functional teams to integrate REST APIs, implement automated testing pipelines, and optimize database queries, which improved system performance by 35%. Previously, I worked at CloudNova, where I designed microservices in Node.js and deployed them on AWS, gaining strong expertise in cloud infrastructure and CI/CD workflows.

I am particularly passionate about building software that enhances user experience and business efficiency. My technical skills include Java, Python, JavaScript (React, Node.js), PHP, MySQL, MongoDB, and Docker. In addition, I hold certifications in AWS Solutions Architect and Scrum Master. I believe that my strong background in software engineering, combined with problem-solving skills and a commitment to continuous learning, make me an excellent fit for this role.

I would welcome the opportunity to further discuss how my skills and experience align with Tech Innovators' goals. Thank you for considering my application. I look forward to the possibility of contributing to your innovative projects.

Sincerely,
John A. Smith
