Location: San Jose, Batangas

Professional Summary

Detail-oriented Data Scientist with 5+ years of experience in statistical modeling, machine learning, and big data analytics. Skilled in transforming complex datasets into actionable insights that drive business decisions. Adept at collaborating with cross-functional teams and presenting findings to technical and non-technical stakeholders.

Professional Experience

Data Scientist

Insight Analytics | San Francisco, CA

Mar 2020 – Present

- Developed predictive models to optimize marketing campaigns, increasing conversion rates by 22%.
- Designed and deployed scalable machine learning pipelines using Airflow and AWS SageMaker.
- Conducted exploratory data analysis (EDA) on large datasets, providing actionable insights for product strategy.
- Collaborated with engineers to implement real-time recommendation systems.
- Delivered presentations and dashboards for executives using Tableau and D3.js.

Technologies: Python, TensorFlow, AWS, Airflow, Tableau

Junior Data Analyst

Visionary Tech | San Jose, CA

Jul 2017 – Feb 2020

- Automated data cleaning workflows in Python, reducing manual work by 40%.
- Assisted in building forecasting models for customer demand planning.
- Created SQL queries and dashboards to track KPIs across departments.
- Contributed to the migration from Excel-based reporting to cloud-based analytics.
Technologies: SQL, Pandas, Scikit-learn, Power BI

Education

Bachelor of Science in Information Technology

STI College Batangas

Certifications

- Google Cloud Professional Data Engineer (2022)
- Tableau Desktop Specialist (2021)

Projects

1. **MediPredict – Healthcare Prediction System**
Machine learning project to predict patient readmission risks using EHR data. Built with PyTorch and deployed with Flask + Docker.
2. **TrendWatch – Social Media Sentiment Analyzer**
NLP tool analyzing Twitter data to track sentiment trends for brands. Built using Python, NLTK, and D3.js for visualization.
